Education

Wentworth Institute of Technology **Boston, MA**
Bachelor of Science in Computer Science *Expected Fall 2027*

Bunker Hill Community College **Boston, MA**
Associate of Science in Computer Science *May 2025*

Technical Skills

Languages: Java, Kotlin, Python, C++, SQL, TypeScript
Frameworks & APIs: Spring Boot, FastAPI, React, REST APIs, PySide6
Cloud & Databases: PostgreSQL, MySQL, Google Cloud Platform (GCP), Azure AI Document Intelligence, Docker
Tools & Workflows: Git, GitHub Actions (CI/CD), Playwright, Postman, Swagger, Jira, Linux
Core Concepts: Data Structures, Algorithms, Relational Database Design, JWT Authentication

Experience

Information Systems & Technology Co-Op **Sep. 2026 – Present**
Adventist Community Services of Greater Washington *Silver Spring, MD*

- Engineered an automated client intake and duplicate-detection pipeline utilizing Python, Playwright, and Azure AI Document Intelligence, successfully processing 140+ records and flagging 12+ database duplicates.
- Deployed physical network infrastructure, including LAN cabling and patch panel terminations, ensuring low-latency facility connectivity.
- Developed Power BI reporting dashboards and digital media assets to support organizational analytics and community outreach.

Projects

HGP Automated Intake Pipeline | *Python, PySide6, Azure AI Document Intelligence* **Sep. 2026 – Present**

- Built and deployed a production intake application currently utilized by office staff, automating multi-agency registration processing for 5,700+ county-wide participants.
- Integrated custom Azure AI Document Intelligence and Playwright automation behind a multithreaded PySide6 review UI, handling form ingestion, strict-to-broad duplicate search chains, and reducing per-entry processing time by 80%+.

CinePraia Cinema Ticket Engine | *React (TypeScript), Java, Spring Boot, PostgreSQL* **Aug. 2026 – Present**

- Co-developing a full-stack cinema ticketing engine with a 3-person team, structured for real-time seat reservation workflows.
- Implemented a stateless Spring Boot security filter chain with encrypted JWT sessions and relational constraints to prevent seat double-booking race conditions at checkout.

My South Church Workspace App | *Java, Spring Boot, MySQL, GCP* **Jan. 2026 – Apr. 2026**

- Designed 15+ REST API endpoints in Spring Boot for directory management, role-based access control (RBAC), and Google Workspace sync.
- Modeled relational schemas via Spring Data JPA and engineered GitHub Actions CI/CD workflows deploying containerized services to GCP.
- Collaborated in an agile 3-person team utilizing Git feature branching and Jira sprint tracking.

Leadership & Involvement

Summer Camp Coding Instructor (Volunteer) **Jul. 2026 – Aug. 2026**
Adventist Community Services of Greater Washington *Silver Spring, MD*

- Instructed 20+ elementary students (Grades 1–5) in computational logic, algorithm structure, and event-driven scripting using Scratch.

HACKBHCC2024 Hackathon **Spring 2024**
Bunker Hill Community College – Third Place Winner ($1,200 Prize) *Boston, MA*

- Collaborated on a cross-functional team to design and present a functional software solution under strict time constraints.
