Aspiring Software Engineer Intern — Backend & API Development

Computer Science student with hands-on experience building backend systems using FastAPI and Spring Boot. Experienced in developing RESTful APIs, implementing authentication, and deploying applications with CI/CD pipelines. Strong collaborator with a track record of building real-world projects in team environments.

Technical Skills

Languages: Java, Kotlin, Python, C++, SQL
Frameworks & APIs: FastAPI, Spring Boot, JavaFX, REST APIs
Cloud & DevOps: Google Cloud Platform (GCP), GitHub Actions (CI/CD)
Tools: Git, IntelliJ, Android Studio, Postman, Swagger, Jira
Core Concepts: Data Structures, Algorithms, Relational Databases, API Design, JWT Authentication

Projects

Prior Authorization Tool (Healthcare MVP) | *Python, FastAPI, REST APIs, SQL* Feb. 2026 – Apr. 2026

- Designed and implemented backend services to support healthcare authorization workflows across multiple modules
- Built RESTful APIs for case creation, validation, and audit logging, enabling structured and scalable data handling
- Developed dynamic validation logic to determine submission readiness based on missing requirements
- Collaborated on a modular system architecture across multiple services, simulating real-world backend environments
- Tested and documented endpoints using Swagger/OpenAPI for real-time validation and usability

My South Church Workspace App | *Java, Spring Boot, MySQL, GCP* Jan. 2026 – Present

- Developed 15+ REST API endpoints for user, role, and group management integrated with Google Workspace APIs
- Implemented secure authentication using Firebase JWT tokens to protect backend services
- Designed relational database schemas using Spring Data JPA and MySQL
- Built CI/CD pipeline using GitHub Actions to automate testing and deploy to Google Cloud
- Collaborated in a 3-person team using Git workflows and Jira for agile task management

Game Deals Tracker (Android App) | *Kotlin, REST APIs, JSON, Volley* May 2025

- Built Android application consuming external APIs to display 1,000+ real-time game deals
- Implemented asynchronous API requests, improving app responsiveness and user experience
- Designed multi-screen UI and handled structured JSON parsing for dynamic data display
- Added user-specific features including favorites and persistent data storage

Experience

Proctor Sep. 2023 – May 2025

Bunker Hill Community College

Boston, MA

- Managed high-volume, time-sensitive testing environments for hundreds of students
- Ensured strict compliance with standardized testing protocols and academic integrity policies
- Demonstrated strong attention to detail, reliability, and situational awareness under pressure

Leadership & Activities

HACKBHCC 2024 Hackathon 3rd Place Winner

- Collaborated in a cross-functional team to design and build a working solution under time constraints
- Contributed to technical implementation and problem-solving, leading to a top-3 finish
- Presented final solution to judges, earning \$1,200 in prize funding

Education

Wentworth Institute of Technology

Bachelor of Science in Computer Science

Boston, MA

Expected May 2027

Bunker Hill Community College

Associate of Science in Computer Science

Boston, MA

May 2025
